RESPONSIBLE. SUSTAINABLE.

Whether it's sourcing from recycled content, keeping waste out of landfills or supporting third-party environmental organizations, Reliable Brand™ products help you meet your sustainability objectives.

Every application. Every time.

Towel & Tissue

Reliable Brand Towel & Tissue products are derived from recycled fibers and meet all recommended guidelines for the procurement of commercial sanitary tissue. Many of the products are also UL ECOLOGO® certified for reduced environmental impact.

Hand Hygiene

Many of our Reliable Brand product formulations hold an UL ECOLOGO certification. This means that they are certified for reduced environmental impact, and indicate that the product has undergone a rigorous, scientific testing, exhaustive auditing, or both to prove its compliance with stringent, third party environmental performance standards.

Chemicals

Reliable Brand Dilution Control Systems are your number one way to affect environmental impact in the chemical space. By reducing inventory, you dramatically reduce waste in the landfills. Just one concentrated 2 L dilution control bottle can replace up to 256 (1 L) RTU bottles in the waste stream. Plus, our packaging is recyclable. In addition, many of our other chemical products carry a third party UL ECOLOGO certification.

Can Liners

First and foremost, we focus on right sizing the customer's liners in order to minimize the waste and spend. We also carry liners with improved performance at thinner gauges which can mean purchasing less plastic for the same job. Reliable Brand can liners are also made from 100% recycled post consumer content and carry a UL ECOLOGO certification as well.

Floor & Hand Pads

100% of the fiber used in our floor pads comes from post consumer recycled PET plastics. They are formulated to biodegrade in a fraction of the time once discarded into a landfill compared to other conventional floor pads. We carry the Full Cycle® symbol on our products to represent this unique attribute and to reinforce our commitment to the environment. The Full Cycle process is now a part of the Green Seal certification program and is recognized as an industry leading practice.

Rhino-X® High Density Can Liners

The high-performance, cost effective liner that makes short work of heavy, wet loads. Advanced high-density films make these liners extremely tough and strong, even at low gauges. Superior film strength. Superior moisture and vapor barrier properties. Star bottom seal eliminates leaks and odors. Great choice for source reduction. Convenient coreless rolls.

Plantation Raw Sugar

Plantation Raw is golden brown and made from the filtered syrups of natural cane sugar. It is mellow, crunchy sugar with the golden taste of cane and, some say, hints of caramel. Plantation Raw is perfect for coffees, teas, toddies, cocoa and mulled wine. It gently sweetens without masking the taste and imparts its gentle flavour right to the end.

Foldunder Cake Boards

Reflective embossed leaf pattern. A unique manufacturing process

in which the foil is wrapped over the edge of the board, eliminating the unsightly raw corrugated edges. Provides a clean edge appearance designed for "Premium Style" cake and bakery items. Traditionally used for wedding cakes that demand superior appearance and require additional support. Ideal replacement for Hand Wrapped and Ribbon Laced Boards. Eliminates the need to double and triple up your boards to obtain the necessary strength.
